

I am concerned at the possibility that the one FM station I listen to could be replaced. I listen to this station with out worry or distress of immoral music or comments. I enjoy the upbeat and encouragement I often receive from a station that shares the same spiritual beliefs. I have found it to be encouraging. They will often share areas of interest within the city that I live in.

They will support programs that allow me the opportunity to give to my community. They will talk of food drives or ways to volunteer into the community (city) that I live in. They inform us of programs that help the homeless or teens. They announce free events within the community that I often can share with family, friends and coworkers.

I truly believe that this station (k-love) offers many avenues that help people of our community and city. They are one of the few radio band stations that offer a simple free gift. That is if you need help, someone to talk to or pray for you this station provides it. If this station was removed it could have a detrimental effect on people's lives.

Thank you for taking the time to hear my concerns.
